

SCIENCE AND TEHCHNOLOGY PARK «TEHNOPOLIS » IASI

The town of Iasi is the main urban center from the north-east of Romania, counting over 300.000 dwellers, it is the second town as size in Romania and it is stipulated that it will become the main pole of development in the east side of EU. Likewise, the town of Iasi is a big academic center, with over 60.000 students a year, in 5 public universities and 3 privat universities (the University «Al. I. Cuza» is the oldest university in Romania) thus having important human resources and qualified labor force.

The Science and Technology Park "TEHNOPOLIS" Iasi has the goal to use the results of the research, to apply the cutting edge technologies in economy and to support the implication of universities in the process of social and economic development.

The domains of priority of the "TEHNOPOLIS" are:

- 1. IT*
- 2. Audio-video*
- 3. Bio-technologies*
- 4. Food industry*

Objectives:

- technologic transfer of the results of the research to the economic agents interested in producing new products or packages of products with value of competitiveness and to sell them on internal and external markets*
- to stabilize the specialists in research and universities*
- to form the young researchers*
- to attract private funds for research and education*
- to put in value the result of the scientific research*
- to create new jobs in the field of advanced technologies*
- to stimulate the innovative potential of the academicians, universitarian personnel, researchers and students*
- to orient the universities and research units towards the economic and social environment*
- to integrate the students and the graduates in the economic and social environment*

- *to stimulate the initiatives of the universities and of the research units to attract new sources for financing*
- *to stimulate the private economic agents to actively participate in development and revaluation of research & innovation, by making high-tech products*
- *to attract foreign companies to invest in technologic transfer activities*
- *to develop scientific, technologic and economic potential at regional level*

According to the authorization, suspension and annulment procedure of the STP no. 5442 / 2003, the Park started to function on the basis of *Functioning Authorization*, issued by Education & Research Ministry, nr. 7 /16.12.2004.

In 2006, the Education & Research Ministry gave the Park the « Award for the Best Park » and in 2007 the Park was nominated for the « European Enterprise Awards ».

The admission in the Park is made based on the *Admission Procedures in STP of the economic agents, approved by ERM Order 4940/2006 published in Official Gazette, 801/25 sep. 2006.*

The opening of the Park was made in 2005, having the following associates:

- ***The City Council Iași***

- ***The City Hall Iași***

- ***Universities:***

- ***Technical University "Gh. Asachi" Iasi***

- ***"Al. I. Cuza" University, Iasi***

- ***Agronomic University "Ion Ionescu de la Brad" Iasi***

- ***Medicine and Pharmacy University "Gr. T. Popa" Iasi***

In the Park area (10,73 Ha)there are the following main objectives:

- *2 buildings, Nucleus and Duplex with rooms for offices, production halls, conference halls fitted and tooled out with performant equipment and exhibition halls (the total area of the buildings is 12.000 m2)*
- *3 labs made in cooperation with the associate universities:*
 - *environment evaluation lab*
 - *crogeny lab*
 - *biotechnology lab*
- *9 lots, 6 of which are fitted out (The sizes of the lots vary from 2088 m2 to 6000 m2)*
- *2 stations of power supply of over 3000 kw*

- *car parks and alleys*
- *of all technical equipments of the park we mention:*
 - abreuvoir*
 - high tech data-voice system, containing phone central, multiprotocol router and optical fiber infrastructure*
 - electronic and human guarding system (internd and extern)*
 - fire system electronic tracked*
 - ventilation and air-conditioning system in the Nucleus building*
 - heating system by our own power-stations*

The Science and Technology Park « TEHNOPOLIS » Iasi offers room for :

- *Offices*
- *Production*
- *Business incubator : 15 « start-up » companies on a 700 m2 area*
- *Research-Development : environment evaluation, criogeny and biotechnology labs*
- *Restaurant, coffe*
- *Exhibitions, conferences, seminars, symposiums*

The companies that now run their activities in The Science and Technology Park « TEHNOPOLIS » Iasi are :

- *S.C. KOBER S.R.L.*
- *S.C. ROTON S.R.L. .*
- *S.C. DELCAM RO S.R.L.*
- *S.C. CONTINENTAL AUTOMOTIVE ROMANIA S.R.L.*
- *S.C. MOELLER ELECTRIC S.R.L.*
- *S.C. MIGRATORY DATA SISTEM S.R.L.*
- *S.C. NESS ROMANIA S.R.L.*
- *S.C. ELECTROALFA INTERNATIONAL S.R.L.*

Services that are free or at a convenient price:

- *guard*
- *fire protection*
- *separate measurement of internal power and water supply*
- *reception desk*
- *exhibitional halls*
- *parking area*
- *fitting out the green*
- *conference and meeting halls (at half of the price for the solicitors outside the Park)*
- *IRC access (tax-free)*
- *access to all scientific and presentation activities that are organized by the administration)*
- *access to the restaurant that will be open in NUCLEUS building*

- *access to financing programmes initiated by ERM for the tenants of STPs*

The Science and Technology Park TEHNOPOLIS Iasi is partner of Enterprise Europe Network, the largest Europe network who offers information and consultancy services for the enterprises. Hereby, the Park offers a large variety of services: the information and practical assistance supply over the market opportunities, the european legislation and the relevant politics of a company or a sector, the support for the SME's in finding the right business partners by using business cooperation and technology data bases delivering information on public biddings and international networks, the development of innovation and research abilities in SME's by supporting the making of synergy with other research actors, the support for technological cooperation and the organization of brokerage events, the assistance of the SME's for them to benefit of the research results, to attend research programmes and to access fonds, especially from the *la Seventh Framework Programme for Research and Technological Development (the Seventh programme for technological research and develoment of EU)*, as well as the involvement of the SME's and the business environment into the policy-making process by the transmission of a feed-back to the Comission and the monitoring of the EU politics deployment in the domain of the compeition and innovation
